

Meterpay Smart Prepayment Top Up Solution

Meterpay is a new technology that allows Landlords a simple solution of collecting payment from tenants before they use the electric.

Once the meters are purchased an invitation email is sent from meter pay inviting you the Landlord to their service. This email will take you to the Meterpay website, here you will input your personal and bank account details to complete your account. You can now log on to your account at any time to change the rates, enable or disable emergency credit, add debt collection and a standing charge.

The Tenant can visit the same website but will only be able to access top up area using the meters serial number and postcode.

This will enable the tenant to add credit of any amount to the meter using either their credit or debit card eliminating the hassle of collecting cash.

At the end of each week all the money topped up on all your meters will be sent to your bank account.

The meter is tamper proof, if at any time the meter is tampered with it will shut itself down, send an email alert to the Landlord and will not reactivate until the landlord authorises it.

This is all secured with an encrypted sim and network between Meterpay them self's and the meter.

Here are some of the benefits to landlords:

- The most secure prepayment solution.
- Simple remote meter management.
- No more coin collection.
- No more card distribution.

Even now the tenants benefits as well such as:

- On-line or telephone payment option.
- Automatic recharge function.
- Usage data including consumption charts.

MeterPay requires an ongoing subscription to support the service. MID rules now allow landlords to pass on administration charges, so most landlords can now choose to apply this through the daily standing charge on the submeters. The subscription can be paid monthly, quarterly or annually, see below for more details.

	Annual	Quarterly	Monthly
Cost per day	21.6p	24p	25.2p
Payment Terms	One annual payment of £78.84	Four quarterly payments of £21.90	Twelve monthly payments of £7.67
Total Annual Cost	£78.84	£87.60	£91.98
