

Single Phase Residential Metering Kit

Summary

Our Single Phase Residential Metering Kits are designed to conveniently give you everything required for the job. All elements can be customised to suit your requirements and our experienced meter engineers can even pre-mount and wire in all elements saving time installing on site. To view available combinations, [click here](#) to view the online product page or contact our friendly sales team on 01268 773 766.

Step 1 – Meter

We have a selection of residential meters available, from the AEL.MF.11-1 simply showing kWh's on its easy read display, to the Iskra ME162 which supports dual tariffs such as Economy 7 and has a configurable pulse output.

Step 2 – Mounting Type

From surface mounted and recessed meter boxes to flame retardant meter boards of all sizes, we can supply an appropriate mounting to suit your installation.

Step 3 – Service Connection

Our WT Henley kits have been designed to make it easy to select your service connection and have the confidence everything you need is included. We can accommodate both fused and solid links, (red head), as well as combined or separate neutral and earth arrangements.

Step 4 – Meter Connection

We can supply double insulated 25mm meter tails or security blocks for added protection, (only compatible with WT Henley Series 7). All kits come complete with 16mm earthing cable and an appropriate double pole earth bar.

Step 5 – Isolator

Where required, we can supply a 100A double pole isolator complete with sealable enclosure for easy mounting.

Step 6 – Installation

Why not let our experienced meter engineers pre-mount and wire in all elements of your Single Phase Residential Metering Kit reducing the time required for installation.
